

SeaHawk Framed Map

Used in conjunction with a SeaHawk distance read controller, a framed reference map cross-references the distance displayed on the controller with a floor plan map.

This 11-inch x 14-inch (28cm x 37cm) framed map helps to identify the precise location of a leak. Hang the map on the wall next to your SeaHawk distance read controller.

RLE completes the template for the reference map at the time of start-up or commissioning of the leak detection system.

Features

- Displays floor plan with location of installed leak detection cable
- 11 inches x 14 inches (28cm x 37cm)
- Framed

Benefits

- Helps identify precise location of leak
- Detail clearly visible
- Durable, protected by acrylic
